(54) Title: INDENONCARBOXYLIC ACIDS DERIVATIVES AND THEIR USE FOR THE TREATMENT OF AND PREVENT-
ING DIABETES AND DYSLIPIDAEMIA

(57) Abstract: The present invention relates to a compound of the formula (I) in which: n is an integer chosen from 1, 2 and 3; Y represents O; N-OR⁹, in which R⁹ represents H or a saturated hydrocarbon-based aliphatic group; CR¹⁰R¹¹, in which R¹⁰ and R¹¹, which may be identical or different, represent H or a saturated hydrocarbon-based aliphatic group; R¹ and R², which may be identical or different, represent H or a saturated aliphatic hydrocarbon-based chain; or alternatively R¹ and R² together form an optionally substituted saturated aliphatic hydrocarbon-based chain; the radicals R³ and R⁴, which may be identical or different, take any of the meanings given above for R¹ and R², or alternatively R¹ and the group R⁴ borne by the carbon alpha to CR¹R² represent nothing and a double bond links the CR¹R² carbon to the alpha CR³R⁴ carbon; or alternatively one of the radicals R¹ and R² forms with one of the radicals R³ and R⁴ an optionally substituted saturated or unsaturated aliphatic hydrocarbon-based chain; one of the radicals R⁵ and R⁶ represents W, and the other represents Z which is chosen from a saturated or unsaturated aliphatic hydrocarbon-based radical; an optionally substituted, saturated, unsaturated and/or aromatic carbocyclic or heterocyclic radical; a radical -alk-Cy, in which alk represents an alkylene chain and Cy represents an optionally substituted saturated, unsaturated and/or aromatic heterocyclic or carbocyclic radical; W represents -XL-CO₂R⁷; -X-L-Tet, in which X and L are as defined below and Tet represents optionally substituted tetrazole; in which L represents a saturated or unsaturated aliphatic hydrocarbon-based chain, which is optionally substituted and/or optionally interrupted by optionally substituted arylene; X represents O; NR⁸, in which R⁸ represents H; a saturated aliphatic hydrocarbon-based group; a group -CO-R' or -SO₂-R', in which R' takes any of the meanings given below for R⁷ with the exception of H; or R⁸ represents an optionally substituted aromatic carbocyclic group; or X represent S(O)_m, in which m is chosen from 0, 1 and 2; R⁷ represents H; a saturated or unsaturated aliphatic hydrocarbon-based group; an optionally substituted, saturated, unsaturated and/or aromatic carbocyclic group; an optionally substituted, saturated, unsaturated and/or aromatic heterocyclic group; and the pharmaceutically acceptable derivatives, salts, solvates and stereoisomers thereof, and also mixtures thereof in all proportions, which can be used in the treatment of dyslipidaemia, atherosclerosis and diabetes.

WO 2004/063148 A1

Eurasian patent (AM, AZ, BY, KG, KZ, MD, RU, TJ, TM),
European patent (AT, BE, BG, CH, CY, CZ, DE, DK, EE,
ES, FI, FR, GB, GR, HU, IE, IT, LU, MC, NL, PT, RO, SE,
SI, SK, TR), OAPI patent (BF, BJ, CF, CG, CI, CM, GA,
GN, GQ, GW, ML, MR, NE, SN, TD, TG).
